UNCOUPLED ENTRIES

All entries, either the same owner or a different owner, shall be uncoupled wagering interests in any race. Same-owner entries will have the least preference in overfilled races. The date system will take preference in determining the first and second parts of entries.

The Preference Date System will be used at the 2026 Gulfstream Park Royal Palm Meet as described below:

Each day's overnight will list the dates of horses including also eligibles to enable trainers to see which dates are getting horses into over-filled races.

1. All horses intended for racing at The Gulfstream Park Royal Palm Meet beginning Thursday, April 3, 2025, will be assigned a preference date. A horse can have only one date at any time. Dates assigned will be of four types: Zero (0) date; Entry (E) date; Race (R) date; Scratch(S) date.
2. All horses and trainers stabled at Gulfstream Park, Palm Meadows, Payson Park, and Palm Beach Downs will have a zero date for all categories. If you run out of town, that date becomes your new date.
3. A horse receives an (E) date corresponding to the date in which he/she was excluded from a race or was on the also-eligible list overnight.
4. A horse receives an (R) date corresponding to the date of a horse's most recent race at Gulfstream Park.
5. A horse receives an (S) date corresponding to the date on which a horse was entered to run on the Turf, Dirt, or Tapeta, included in the main body of a race, the overnight, and was scratched.
6. In over-filled races, preference will be given to horses in order of their assigned preference dates, the earliest date first. Horses having identical dates will be chosen by lot. In cases where dates are the same, the preference will be in the order of 0, E, R, and S dates.
7. Once a final has been announced, additional entries in overfilled races will have the least preference.
8. The draw of a stake or overnight stake is not subject to date preference.
9. Preference dates are transferred through the change in ownership or trainer, only after the proper transfer procedures have been completed through the Steward's Office.
10. Trainers are responsible for verifying dates before scratch time.
11. Horses placed on the Stewards, Veterinarians or Starter's lists will not be permitted to enter until they are off the list unless approved by The Stewards or Racing Secretary and off the list by race day.

Horses that are immediately transferred to the receiving barn after the race will be allowed to cool out. They will be examined and jogged by a Regulatory Veterinarian. If the horse is observed to have bled, be physically distressed, medically compromised, unsound, or lame before the horse is released the claim shall be void. The Track Veterinarian shall communicate with the Stewards to inform them of the voided claim. The claim shall not be voided, if, prior to the race in which the horse is claimed, the claimant elects to claim the horse regardless of whether the Regulatory Veterinarian determines the horse will be placed on the Veterinarian's List.

Bled is defined as the Track Veterinarian observing a horse bleeding from one or both nostrils and determining that such bleeding is a direct result of exercise-induced pulmonary hemorrhage.

If the horse is determined to be unsound or observed to have bled by the Track Veterinarian, it shall be placed on the Veterinarian's List. In the event the claim is declared void, the horse will be returned to the custody of the original trainer. Contact Steve DiMauro, Steward at 954-802-4180 or Dr. Carlos Aponte at 954-422-3771.

Only one-time disposable syringes and infusion tubes are authorized for use in the treatment of racehorses on the grounds. Only veterinarians shall have on their person or among their personal effects, while on the premises, a hypodermic syringe or needle, or any medicines or drugs prohibited under the Division's or Gulfstream Park's medication rules.

Veterinarians shall provide a daily log of horses treated by the trainer, the date and time, and the amount and type of medication. This log shall always be available for inspection by the Division and Association Veterinarian. These records may be used by Regulatory Veterinarians in the performance of their duties at the racetrack, for transfer of 60-day medical records to the new trainer of a claimed

EQUINE FATALITIES

Upon the death of a horse on the grounds of Gulfstream Park or Palm Meadows the association veterinarian, at their discretion through their agents, may take control of the bodily remains of the deceased horse; and/or order an appropriate necropsy to be conducted by a qualified veterinarian. Should the death of a horse occur during the running of a race, control of the horse will remain with the association veterinarian until released. Any owner or trainer who wants a necropsy performed on their horse must immediately notify Security and make their own arrangements for the same.

Consent is also given to the track veterinarian to release the injury date when required or deemed appropriate. It is the responsibility of the trainer and the attending licensed veterinarian to inform the stable area security office that a horse is deceased and to provide the required details and information.

Upon the death of a horse on the grounds of Gulfstream Park, the remains of the deceased horse shall not be removed without a death certificate by a licensed veterinarian filed with the Security.

PROHIBITED PRACTICES

The following are prohibited practices:

1. Use physical or veterinary procedures to mask the effects or signs of injury to allow training or racing to the detriment of the horse's health and welfare.
2. Use of extracorporeal shock wave therapy in a manner that may desensitize limb structures during racing or training.
3. Surgical or chemical neurectomy to cause desensitization of musculoskeletal structures associated with the limbs.
4. Thermocautery includes but not limited to pin firing and freeze firing, or application of any substance to cause vesiculation or blistering of the skin, or a counter-irritant effect.
5. Use of a device to deliver an electrical shock to the horse including but not limited to cattle prods and batteries.
6. Use of electrical medical therapeutic devices including magnetic wave therapy, laser, electromagnetic blankets, boots, electroshock, or any other electrical devices that may produce an analgesic effect within 48 hours of a training activity (timed workout) or the start of the published post time for which a horse is scheduled to race.

CLENBUTEROL

1. Clenbuterol use is prohibited in racing and training unless the following conditions have been met a. The prescription for clenbuterol is made for a specific horse based on a specific diagnosis. The prescription and volume dispensed cannot exceed a treatment period of 30 days. b. The veterinarian must provide a copy of the prescription and diagnosis to the Gulfstream Park Senior Veterinarian for review and approval. The horse may not receive clenbuterol before this approval is issued.

   e. The horse may not enter to race until all requirements have been completed in subdivision (d).
2. If clenbuterol is detected in a horse's post-race or out-of-competition sample and appropriate notification as outlined in subdivision 1 (a) or (b) was not completed, the horse shall immediately be placed on the official Veterinarian's List pending the outcome of an investigation. (c) The horse shall be required to meet all conditions for removal from the veterinarian's list outlined in subdivision 1 (d), above. clenbuterol without a valid veterinarian's prescription is a violation of Gulfstream Park House Rules.

TCO 2 TESTING

The practice of milk-shaking horses entered to race at Gulfstream Park is PROHIBITED. Testing for total carbon dioxide (TCO 2) blood serum levels will be conducted. **All horses competing in Graded Stakes will be tested.** Additionally, any horse that entered to race may be randomly selected for testing. Refusing or failing to permit the taking of a pre-race blood sample will result in a scratch from the race and shall be considered a violation of this house rule, resulting in disciplinary action by the Stewards.

HYPERBARIC OXYGEN THERAPY

A horse shall not receive hyperbaric oxygen therapy within seventy-two (72) hours of race post time. Horses receiving this therapy may do so only within a valid veterinarian/client/patient relationship. The attending veterinarian must be on the premises during treatment and must provide a log of all horses receiving treatment. Additionally, the operator must provide a certificate of liability insurance. These restrictions shall apply to all other forms of purified oxygen treatment.

EXTRACORPOREAL SHOCK WAVE THERAPY

Extra Corporeal Shock Wave Therapy (ECSW) equipment (focused shock wave and radial pressure wave) may be employed only by veterinarians licensed and in good standing with the Florida Board of Veterinary Medicine and the Florida Division of Pari-Mutuel Wagering. Before administering Shock Wave therapy to a horse, the treating veterinarian will be required to contact Security in the Stable Office of the corresponding facility. Security will ensure that a signed Shock Wave Treatment Policy is on file prior to authorizing treatment. Security will accompany the treating veterinarian to the barn and remain present during the treatment of a horse. A Shock Wave Treatment Report must be submitted to Security before the treatment is completed. Shock Wave Treatments may be administered seven days between the hours of 10:00 am and 5:00 pm. Shock Wave Treatment Reports will be maintained by Security and will be made available upon request. Security will make every reasonable effort to have an officer available to accompany the attending veterinarian and verify the treatment. Veterinarians planning to treat several horses during one session are encouraged to make an appointment with Security. The use of Shock Wave Therapy shall be disclosed to the Regulatory Veterinarian no less than 48 hours prior to treatment and shall not be permitted unless the following conditions are met:

1. Any Shock Wave Therapy machine may only be performed with machines that are registered and approved for use by the State Racing Commission and used at a previously disclosed location that is approved by the State Racing Commission.

The Veterinarian and Trainer shall be suspended from the Racetrack for a period of 5 days if Shock Wave Therapy has not been reported within 48 hours of any treatment or procedure administered to a covered horse. For each subsequent omission of reporting, an additional 5 day suspension shall be added. If there are 3 violations in a calendar year, the Veterinarian and Trainer shall be suspended for 6 months in the subsequent calendar year.

A Veterinarians' List shall be maintained by the Authority of all Horses that are determined to be ineligible to compete in a covered horserace in any jurisdiction until released by a Regulatory Veterinarian.

1. The following horses shall be placed on the Veterinarians' List until removed in accordance with Rules on the Duration of Stay on the Veterinarians' List and Removal of Horses from the Veterinarians' List.
   (a). Horses affected by illness, physical distress, medical compromise, unsoundness, injury, infirmity, heat exhaustion, positive test or overage, administration of a medication invoking a mandatory stand down time, administration of Shock Wave Therapy, positive out-of-competition test or any other assessment or determination by Regulatory Veterinarians that such horse is unfit to race.

   (d). Diagnostic testing may be required for any horse placed on the Veterinarians' List, at the discretion of the Safety Director, Regulatory Veterinarian, or Association Veterinarian.

2. Horses placed on the Florida Veterinarian's List must wait a minimum of seven days before being eligible to work for the regulatory veterinarian. If the regulatory veterinarian feels that a seven-day waiting period is insufficient for the injury in question, the trainer will be required to provide evidence proving otherwise. This could include, and not be limited to,

the performance of diagnostic procedures and disclosure of results.

3. Horses placed on the Veterinarians' List for unsoundness or Epistaxis shall remain on the list for 14 days.
4. Horses placed on the Veterinarians' List multiple times for unsoundness within the previous 365 days shall remain on the Veterinarians' List for 45 days for the second time, 75 days for the third time, and shall be barred from further racing after the fourth time.

REMOVAL OF HORSES FROM THE VETERINARIANS' LIST Regulatory Veterinarians may remove horses from the Veterinarians' List and shall document such removal to the authority.

A horse placed on the Veterinarians' List as unsound or suffering from Epistaxis may be removed from the Veterinarians' List upon satisfaction of the following:

1. A trainer must apply to the Regulatory Veterinarian for permission to work the horse for removal from the Veterinarians' List. Upon receiving such approval, the trainer and attending veterinarian must observe the horse jog and submit to the regulatory veterinarian a co-signed statement that the horse is fit to perform a workout.
2. The horse must perform a workout under the supervision of the Regulatory Veterinarian and demonstrate to the satisfaction of the Regulatory Veterinarian that the horse is sound to race. Once a horse has worked for the Regulatory Veterinarian it must race within 60 days of removal from the Veterinarian's List or the horse will be placed back on the Veterinarian's List.
3. The Regulatory Veterinarian determines there is no evidence or signs of Epistaxis, physical distress, medical compromise, unsoundness, or lameness within 1 hour after the workout conducted pursuant to paragraph 2 above. A horse placed on the Veterinarians' List as physically distressed or medically compromised may be removed from the Veterinarians' List

provided sound health has been declared by the attending veterinarian or demonstrated to the Regulatory Veterinarian and documented to the Authority.

4. In addition to the requirements set forth herein and any requirements of the protocol, if a horse is placed on the Veterinarians' List for a positive test or overage of a primary substance invoking a mandatory stand-down time, a positive out-of-competition test, or any other veterinary administrative withdrawal, the horse shall be prohibited from entering and may be released from the Veterinarians' List only after also undergoing a post-workout inspection by the Regulatory Veterinarian.
5. Horses must work, with the regulatory veterinarian present no less than ½ mile in 52 seconds or less. Horses may be required to work 5F depending on their history or veterinarian's list jurisdiction.
7. Horses must jog soundly prior to their work, immediately after their work, and back at the barn once they are cooled out. Horses that are unsound at any time will remain on the veterinarian's list.
8. All horses must be sampled for the presence of medications. Samples containing medications more than permitted race-day levels will remain on the veterinarian's list. Split samples will not be available for testing.
9. Trainers with medication violations will be subject to penalties imposed by management and not limited to fines, removal of the horse from the grounds of the association, and/or suspension.
10. Management exercises discretion with respect to the degree of the medication violation and the corresponding penalty; Veterinarian List medication penalties must be satisfied prior to accepting future entries from the trainer.
11. If the horse breezes in an acceptable fashion and jogs soundly for the regulatory veterinarian, YOU MAY ENTER THE HORSE while waiting for the blood work results, however, if the blood work results come back positive or do not arrive before the first post on race day, the horse will be scratched. The owner and trainer of any horse placed on the veterinarian's list will be notified, and the owner will be liable for the cost of the post-work blood test.

and said facilities; and (c) GULFSTREAM PARK reserves to itself the exclusive right and sole discretion to reduce the number of stalls assigned and/or change the location of stalls assigned to the Licensee or to cause the removal of any horse from the Premises.
